NOV industrial elevators are designed for reliable operation and long life cycles in the harsh environments of various industrial settings, such as power plants, cement plants, lime plants, coal handling facilities, steel mills, refineries, mines etc.

## NOV - UP TO 2, 500 KG

LC: 2,500 kg / H: $350 \mathrm{~m} / \mathrm{S}: 90 \mathrm{~m} / \mathrm{min}$
Control: fully automatic, using Selective Collective, or semi-automatic, using direct floor selection (Single Automatic).

The motors can be controlled by a variable frequency drive, or connected direct on line (DOL).

We can completely design, manufacture and install the elevator specifically per the customer's requirements and needs.
Our elevators are available in various surface finishes, such as painted, hot-dip galvanized or stainless steel.
Quick and easy installation. Possibility of reaching great heights. No need for an enclosed shaft.

## EQUIPMENT OPTIONS:

- Overload protection
- Cable trolley on vertical rails beside the car, or on the mast under the car
- Single-piece or bi-parting car doors
- Erection boom
- Automatic rack lubrication
- Air-conditioned or heated elevator car and control panels

Maximum car internal dimensions
Maximum load capacity
Standard door clear height
Maximum lifting speed
Motor power
Motor control
Voltage system
Rated current (400 V • 480 V )
Main protection (400 V 480 V )
Mast
Max. lifting height
Control
Standard base landing height above ground
$1,495 \times 3,330 \times 2,400 \mathrm{~mm}$
$2,500 \mathrm{~kg}$
2,000 mm
up to $90 \mathrm{~m} / \mathrm{min}$
according to configuration
Frequency inverter or DOL
according to configuration
