TRANSPORT PLATFORM TP MX 1024

TP MX 1024 transport platforms are used to transport people and material. The main advantages of TP MX 1024 include compact transport and operating dimensions. This platform can be used on virtually any construction site. Despite the minimum space required, the TP MX 1024 platforms are extremely powerful and reliable.

TP MX 1024

LC: 1000 kg / H: 200 m / S: 12 / 24 m/min

Control: key switch for selecting operating modes: passenger transport - only from the cage, material transport - only from the base landing.

A rotary switch ensures easy and convenient control of the direction of travel

Platforms: Thanks to reliable and robust landing bars, the platform can be efficiently unloaded and loaded at landings.

SPECIAL EQUIPMENT

- PLC - diagnostic mode
- Folding erection platform
- Base station enclosure
- Trailing cable overload limit switch
- Overhead protection

| Technical data | TP MX 1024 |
|-------------------------|------------------|
| Car internal dimensions | 1,400 x 1,700 mm |
| Load capacity | 1,000 kg |
| Maximum lifting speed | 12 or 24 m/min |
| Maximum lifting height | 200 m |
